

ACS Recovery Services

Flexible Subrogation and Overpayment Recovery

Up to 3% of U.S. medical claims are paid incorrectly by healthcare payers. This costs the healthcare industry billions of dollars each year. We have the expertise, resources, and tools to maximize your identification and recovery. Through our focus and expertise, we deliver increased savings and bottom line results to you.

Subrogation

ACS blends tools, technology and experience to uncover every possible recovery opportunity. Our sophisticated investigation process identifies all potential sources of recovery including motor vehicle accident, product liability, premises liability, and medical malpractice. Once identified our experienced recovery specialists, working closely with our legal staff, assert the rights of our clients to achieve the best possible settlement. We eliminate cost shifts to healthcare payers when a workers' compensation carrier is liable.

Overpayment Services

ACS Recovery Services goes to great lengths to identify overpayments, reduce payment leakage, and improve member satisfaction for our clients. We provide supplemental coordination of benefits (COB) and recovery. We supplement your internal COB efforts to identify and recover benefits paid where Medicare or another payer should have paid primary. ACS shares the updated information with our client to prevent future improper payments.
