

# ACS Security Consulting Services

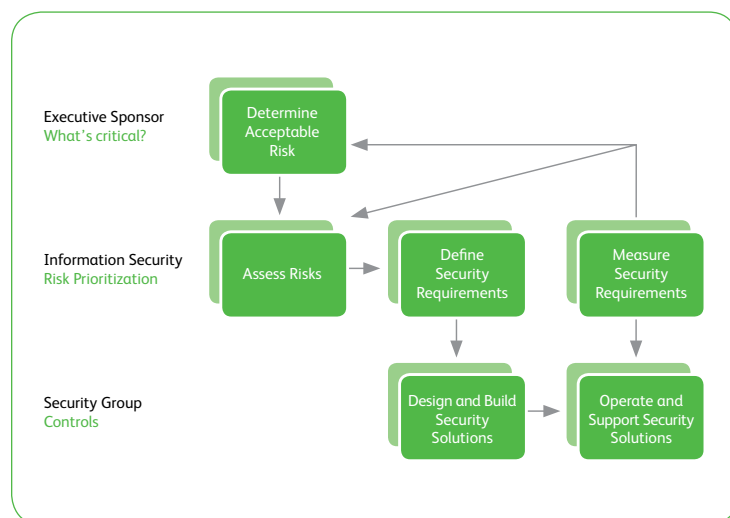

Which threats are your first priority?

Many businesses struggle to determine where and how to prioritize their security plans and budgets. After all, as your business evolves, so do the threats to it. With threats ranging from sensitive information losses to financial attacks to insider fraud and process failures, knowing where to invest can be a complex puzzle.

At ACS Information Security Services, we can help identify the biggest threats to your business, and then recommend prioritized solutions and next steps to protect your business and your budget.

## Our Focused Consulting Assessments

- **Security Posture Assessment.** Assesses your overall security posture, including:
  - Architecture
  - High-level reviews of policy and processes
  - Technical assessments with recommendations for improvements
- **Security Policy and Process Review.** Assesses your policy and procedures, with recommendations for compliance improvements
- **External Technical Security Assessment.** Assesses your mapping technology assets and vulnerabilities to external (Internet) business risk
- **Internal Technical Security Assessment.** Assesses your mapping technology assets and vulnerabilities to internal business risks
- **Physical/Operational Security Assessment.** Assesses your physical security controls for facility and operations security

# ACS Security Consulting Services

## Our Benefits To You

- **Cost Justification.** Our security risk assessment process automatically and directly generates justification for security recommendation in terms of business.
- **Communication.** By acquiring information from other parts of a business unit, our security risk assessment boosts communication and expedites decision-making.
- **Baselining.** Our process provides a baseline for security planning, then recommends immediate solutions and a corrective action plan against known vulnerabilities and threats.
- **Prioritization.** Our assessment maps security requirements to your business objectives, helping ensure that objectives can be achieved. It also prioritizes risks to business operations and provides a “vulnerability blueprint.”

## Our Deliverables

- Assessment of the organization’s security posture
- Evaluation of physical security environment
- Examination of policies and procedures
- Prioritized recommendations and action items
- Security Risk Gap Assessment
- Risk Mitigation Plan for identified security risk

## Our Risk Management Methodology

We use a risk management methodology to assess the threats in your environment. This methodology is governed by the P-D-C-A (Plan, Do, Check, Act) life cycle. In this continuous improvement cycle, your environment is regularly assessed for new and emerging threats. It combines your industry vertical with our involvement in the security industry community. It also takes into account regulatory and statutory requirements.
